SKILLS & TECHNICAL PROFICIENCIES

Technical: SQL (MySQL), Python (pandas, matplotlib), Excel (Pivot Tables, Financial Modeling), ETL Pipelines, Data Visualization, Power BI, EHRs (Epic, Cerner, Meditech), React, TypeScript, FastAPI, PostgreSQL, SQLAlchemy, Alembic, Docker, Vercel, Google Cloud Console, BigQuery, Google Agent Development Kit (ADK), Data Modeling

Tools: Salesforce CRM, Asana, Jira, Monday.com, Microsoft Office Suite, Notion, Figma, Excalidraw

EXPERIENCE

Whis LLC
Pittsburgh, PA

Founder and Principal
May 2026 to Present

- Lead product and technical delivery end to end for Whis LLC, which connects fragmented business data (ERP, CRM, quoting tools) with external research to build a consistent model of customers, sites, programs, and relationships
- Gathered requirements and data definitions with client stakeholders, then design the architecture, build the application, review every implementation change, and manage deployment
- Built and delivered 'Omni Prospect,' the first platform built on Whis, which turns that model into specific, explained recommendations for the people responsible for acting on them. Approved by the client for production use

Source 1 Healthcare Solutions
Pittsburgh, PA

Consultant / Client Lead
Nov 2022 – Oct 2024

- Analyzed millions of rows of claims data using SQL (MySQL) to identify denial patterns, CPT/ICD-10 coding errors, and revenue leakage across 10+ client portfolios; recovered $2.8M in lost revenue and reduced denial rates by 20% through targeted remediation
- Built data models and conducted quantitative trend analysis using Python (pandas, matplotlib) and Excel (pivot tables, financial modeling) to support revenue cycle benchmarking, payer reimbursement analysis, and population health reporting
- Led regulatory gap analysis for an international AI telehealth company entering Medicare and ACA markets; synthesized findings across HIPAA, CMS, ACA, and state requirements into a quantified risk framework for C-suite decision-making
- Designed and executed operational assessments benchmarking healthcare clients against federal and state regulatory standards; identified performance gaps, quantified improvement opportunities, and delivered data-driven recommendation decks to executive leadership

St. Clair Hospital
Pittsburgh, PA

Psychiatric Aide
Mar 2026 – Present

- Provide direct patient care in acute inpatient psychiatric setting; gained ground-level exposure to how coverage design decisions, prior authorization requirements, and formulary restrictions translate into measurable access barriers

INDEPENDENT PROJECTS

Omni Prospect (Whis LLC)

- Commercial intelligence platform that combines a client's ERP, CRM, and quoting data with external research to produce explained recommendations for the people who act on them
- Stack: React, TypeScript, FastAPI, PostgreSQL, SQLAlchemy, Alembic, Docker; deployed in the client's Google Cloud environment

EMPATH Unit Clinical Staffing & Operations Platform

- Designed and developed a nurse scheduling application that automates shift assignments based on staffing requirements, employee preferences, and historical scheduling equity
- Developed a unit operations dashboard tracking patient census/acuity data, average length of stay, patient-level financial metrics, and nursing-hours per patient to justify staffing and resource allocation decisions; enabled nurse management to advocate for the addition of two nursing positions

Healthcare Policy & Regulatory Monitor

- Built an automated regulatory intelligence pipeline that monitors OIG, CMS, FDA, Federal Register, and congressional activity, eliminating hours of weekly manual compliance research
- Integrated 30+ government APIs and industry feeds into a Python-based workflow that collects, filters, and structures healthcare policy updates

EDUCATION

University of Pittsburgh
Pittsburgh, PA

Bachelor of Science, Psychology
Dec 2025
