EXPERIENCE

Whis LLC Pittsburgh, PA
Founder and Principal May 2026 – Present

- Founded Whis LLC and built Omni Prospect, a commercial intelligence platform that combines ERP, CRM, and quoting data with public contract announcements and industry research to identify and prioritize business opportunities; approved by the client for production use.
- Own product design, architecture, development, and deployment; translate requirements with clients' technical and commercial leaders into a working application using React, TypeScript, FastAPI, PostgreSQL, Docker, and Google Cloud.
- Designed a BigQuery gold data layer and explicit matching rules to normalize customer, site, and business-unit records. Combined deterministic opportunity scoring with LLM-assisted research to produce evidence-based recommendations and flag conclusions requiring human review.

St. Clair Hospital Pittsburgh, PA
Psychiatric Aide Mar 2026 – Present

- Provide direct care in acute inpatient psychiatry, with firsthand insight into staffing constraints and patient access barriers arising from coverage, prior authorization, and formulary restrictions.
- Built the EMPATH Unit Clinical Staffing & Operations Platform to automate nurse scheduling around unit needs, shift preferences, and historical scheduling equity.
- Developed dashboards tracking census, acuity, length of stay, patient-level financial metrics, and nursing hours per patient; enabled nurse management to advocate for two additional nursing positions.

Source 1 Healthcare Solutions Pittsburgh, PA
Consultant / Client Lead Nov 2022 – Oct 2024

- Analyzed millions of claims records across 10+ client portfolios using SQL to identify denial patterns, coding errors, and revenue leakage; recovered $2.8M in lost revenue and reduced denial rates by 20% through targeted remediation.
- Led market-entry regulatory gap analysis for an international AI telehealth company entering Medicare and ACA markets; synthesized HIPAA, CMS, ACA, and state requirements into a quantified risk framework for C-suite decisions.
- Built Python and Excel models for revenue cycle benchmarking, payer reimbursement analysis, and population health reporting; assessed operational and regulatory gaps, quantified improvement opportunities, and presented recommendations to executive leadership.

ADDITIONAL PRODUCT DEVELOPMENT

Healthcare Policy & Regulatory Monitor

- Built a Python regulatory intelligence pipeline integrating 30+ government APIs and industry feeds, including OIG, CMS, FDA, the Federal Register, and congressional activity, eliminating hours of weekly manual compliance research.

EDUCATION

University of Pittsburgh | B.S., Psychology Dec 2025

SKILLS

Analytics: SQL, Python (pandas, matplotlib), Excel financial modeling, Power BI, data modeling, ETL pipelines. Product: React, TypeScript, FastAPI, PostgreSQL, BigQuery, Docker, Google Cloud. Healthcare: claims analysis, reimbursement, regulatory analysis, Epic, Cerner, Meditech.
